

SEARCH FOR SOMETHING

by

Joaquin Emilio Siado Castañeda

A DISSERTATION

Presented to the Faculty of

The Graduate College at the University of Nebraska

In Partial Fulfilment of Requirements

For the Degree of Doctor of Philosophy

Major: Physics and Astronomy

Under the Supervision of Professor Daniel Claes

Lincoln, Nebraska

July, 2020

SEARCH FOR SOMETHING

Joaquin Emilio Siado Castañeda, Ph.D.

University of Nebraska, 2020

Advisers: Dan Claes and Aaron Dominguez

my abstract

“... Josefa.

“...laca.”

yo y tu.

“...come lady come.”

pa darte.

to Menas and nenita

ACKNOWLEDGMENTS

Many people has contributed to make this work possible that it is impossible to name them all.

Table of Contents

List of Figures	vii
List of Tables	viii
1 Introduction	1
2 The LHC Experiment and the CMS Detector	2
2.1 The LHC	2
2.1.1 LHCb	3
2.1.2 Atlas	3
2.1.3 ALICE	3
2.2 CMS	3
2.2.1 The Muon Detector	3
2.2.2 Ecal	3
2.2.3 HCal	3
2.2.4 Pixel Detector	3
3 The SM and BSM Theories	4
4 Event generation, simulation and reconstruction	5

6	Search for the particle	6
7	More on the Analysis?	7
7.1	Introduction	7
8	Module Production for the Phase 1 CMS Pixel Detector Uupgrade	8
8.1	IV-Curve	8
8.2	visual inspections	8
8.3	Module assembly	8
8.4	Quality Control	8
9	Beam Test of the RD53 chip for CMS Pixel Detector Upgrade	
	Phase 2	9
9.1	Introduction	9
9.2	The RD53 Chip	9
9.3	Purpose of Test Beam	9
9.4	Test Beam Set Up	9
9.5	Results	9
10	Conclusions	10
10.1	Analysis	10
10.2	Phase 1	10
10.3	Beam Test	10
	Bibliography	10
	References	11

List of Figures

List of Tables

CHAPTER 1

Introduction

Talk about particle physics in general and the organization of the documents

CHAPTER 2

The LHC Experiment and the CMS Detector

Small intro

2.1 The LHC

With 27 km in circumference and located in the Swiss-french border [1]

2.1.1 LHCb

2.1.2 Atlas

2.1.3 ALICE

2.2 CMS

2.2.1 The Muon Detector

2.2.2 Ecal

2.2.3 HCal

2.2.4 Pixel Detector

CHAPTER 3

The SM and BSM Theories

Proposed in the 1960s the standard model of particles physics has been successful in describing many phenomena of the particle world

CHAPTER 4

Event generation, simulation and reconstruction

Description of event generation and simulation

CHAPTER 6

Search for the particle

Data analysis details

CHAPTER 7

More on the Analysis?

7.1 Introduction

More?

CHAPTER 8

Module Production for the Phase 1 CMS Pixel Detector Upgrade

As discussed in chapter 2 the CMS pixel detector will suffer from radiation damage throughout its lifetime hence the need for periodical updates. The first version of the detector was known as phase 0, in 2017 the pixel detector was replaced during the so-called phase 1 upgrade and phase 2 upgrade is projected to take place in 2025 [?] when the current detector will be close to the end of its lifetime. From 2013 to 2016 the University of Nebraska, high energy group UNL-HEP collaborated with several U.S. institution to deliver almost 600 modules which then became part of the forward region of the pixel detector, (FPix). This chapter will describe [2]

8.1 visual inspections

8.2 IV-Curve

8.3 Module assembly

8.4 Quality Control

CHAPTER 9

Beam Test of the RD53 chip for CMS Pixel Detector Upgrade Phase 2

9.1 Introduction

9.2 The RD53 Chip

9.3 Purpose of Test Beam

9.4 Test Beam Set Up

9.5 Results

CHAPTER 10

Conclusions

10.1 Analysis

10.2 Phase 1

10.3 Beam Test
